

software. Recording time on supplied 80 GB Hard drive = 5.1 hours, 7.5 hours on a 120 GB hard drive

CASABLANCA KRON

Casablanca Kron is aimed at the discerning corporate user, the entry level professional, and DV users that require broadcast quality results.

Casablanca Kron is the direct successor of the Casablanca I system and boasts Native DV (uncompressed DV within the system for absolutely no quality loss) as well as MPEG-2 compression, providing Kron with approximately 12 hours of digital running time on its standard 80 GB hard drive. MPEG-2 is industry standard and is essential for DVD authoring. IDE or SCSI hard drives can be used.

from and to a digital camcorder or digital VCR. Without further conversion, all data is recorded to the internal hard-drive - this means excellent picture quality. In addition, you can of course use analogue material in your projects. Record your finished project to either analogue recorders or directly onto digital tape using the DV ports.

- **DVD-writer and DVD DICON**
Create your own DVDs using the integrated DVD-writer. And thanks to DVD DICON, video data can be converted to the DVD's video format in real time. A hardware supported MPEG-2 compression makes this possible, resulting in a conversion time that is up to 20 times faster than on PCs. The DVDs can be used

between 4 and 128 MB and are considerably faster than floppy discs, making for really fast software updates.

NOWHERE NEAR HARMLESS: THE SOFTWARE

- **Smart Edit:**
It has never been this easy to edit. The new user interface is easy to learn for novices and has a logical concept. Step by step, you will be creating your perfect movie.

- The most important new features compared to the Classic interface:
- Better quality of the scene stamps.
 - Fast creation of "scenes" in DV mode (faster than real-time).
 - Automatic split of DV capturing, including already edited material.
 - Audio record from the second track

Casablanca **PRESTIGE**

Standalone nonlinear video editing system with integrated Realtime DVD writer

THE NEW CASABLANCA PRESTIGE

Casablanca Prestige is the new, smart production solution for digital video editing. Make your video and record to DVD - without external, additional equipment and totally without a PC or PC experience.

- The hard-core hardware facts:
- DV port and Direct-DV mode as standard:

Casablanca Prestige features two DV or I-Link in/out ports. This allows you to directly record and output data

- on nearly all available DVD players.
- Flexibility thanks to front inputs and removable 80GB hard-drive.
- The front inputs simplify capturing from the camera to Casablanca Prestige tremendously. The hard-drive is removable for limitless expandable capacity.

Moreover, Casablanca Prestige features a SmartMedia-drive. These SmartMedia cards have a capacity of

- of a DV camera.
- Audio: Sound control, display of volume levels, automatic trimming in gaps, over-modulation display.
 - Improved stills
 - Audio samples can directly be imported from a CD.

COUNTLESS EFFECTS IN REAL-TIME.

Casablanca Prestige accelerates the creation of render-intensive effects and titles. Many 2D effects are created in real-time and are available for playback immediately after you have added them to the storyboard.
